

On Line Training Support

Simplify your training efforts by using our new Haemoview Diagnostics E-learning. Our online learning courses allow for complete familiarity our products, so users are always confident and competent to support patient care.

Access Anytime

Haemoview Diagnostics E-learning is available 24 hours a day, 7 days a week. Once assigned modules are completed, the modules are always available for a quick refresher. There are no expirations or time limits, nor any capacity limits. Our E-learning is ideal for ongoing training and support of your staff

Site Content

There are several self-paced modules that focus on our range of products. Some courses include in-service videos, while others are interactive modules focusing on how to use or products for basic and advanced users. Courses are added as new products and features are introduced.

Track Progress

Staff compliance and course completion can be tracked. Reports can be generated, exported, and printed as needed. Certificates of completion are available once each module is completed and annual reminders automatically generated for each user.

System Requirements

A connection to the Internet is required to view any course. Use the latest versions of browsers to view the courses. The user interface adapts for desktops and laptops to tablets and smart phones.

For access users must provide their full name, hospital details and hospital email for an access code to be provided.

Ready to start your E-learning? Ask your local Haemoview support person for details or go to our website for more information.
